

THE CHURCH OF THE PHANTOM LIBERTY

Animation

The final stage of the project brought the architectural model and multidirectional script together through a one-minute 3D animation. Rather than documenting the designs, the animation presents them as fragments of a speculative history. Through a series of cinematic scenes, the viewer follows the discovery of an enigmatic architectural artefact, its display within a museum, and the eventual excavation of the monumental structure from which it originated. The narrative remains deliberately ambiguous, inviting questions about truth, mythology, and the construction of history.
